

The radio tower beacon light has been out at radio station WHAP (Hopewell) for over a year. I have contacted you (FCC), the local City Manager and the local police dept. As expected, nothing has been done to correct the problem. Low flying aircraft are in danger of this neglect. I am again, notifying your department of this problem. The last time you e-mailed me pages of regulations, a typical bureaucratic response. You are supposed to enforce the regulation, not me. I request that this complaint be given to Chairman Powell and I do expect the courtsey of a reply.
